

SmartCNX™ Controller

Advanced connected controller

The future of smart, connected gate automation. SmartCNX controller manages all operator functions and setting through a simple programmable interface.

SMART

- SmartCNX installer smartphone app
- Intelligent inputs take pulsed or 10K resistive sensors
- BlueBUS input
- 5 programmable digital inputs for sensors, detectors, or other access controls
- Dedicated inputs for dual gate and sequenced gates
- Toolless wire terminals
- 3 programmable relay outputs
- 4 Hy5B™ vehicle detector slots
- Extended history event log
- USB port for software updates and log files
- Compatible with Nice OXI receiver

CONNECTED

- Integrated HyNet™ Technology provides remote management capabilities:
 - Monitor the gate operator from your security platform
 - Manage operator settings and configuration
 - Update software to your operator
 - Automatic notification of alerts and faults
 - Remote diagnostics
 - Check cycle count
- Optional I/O Expansion board module provides 8 additional relay outputs and 8 additional digital inputs to cover the needs of the most complex installations.

SmartCNX installer smartphone app for full control from your phone

- Bluetooth connection to smartphones
- Intuitive to use
- Full control of operator settings

HyNet™ Technology

Status Screen: Monitor gate status and cycle counts

Event Log: View gate events, alerts, logs and parking counts
